

SELF-ADHESIVE RIDGE TAPE IZOVENT EXTRA

Ridge tape is used for sealing the ridge tiles of pitched roof coverings based on metal sheet tiles or other roof metal sheeting. The product is perfect for sealing the roofing of residential, industrial and agricultural buildings and other structures. It is used for new projects, as well as to modernise existing roofs.

Features:

- perfect vapour permeability
- good roof ventilation
- blocks insects and prevents small bird nesting
- equipped with butyl tape, enables roof ridge sealing at low roof slopes
